

# IMPERIAL

design: Nauris Kalinauskas\_2005

## carpeting

This multi segment floor covering is designed to utilise floor space. Decorative pieces of IMPERIAL are connected to create a rug with the potential to form many different configurations of shape, size and colour. This solution is especially convenient when it is a need to change the room interior – the carpet can be easily adjusted to a new place because there are no size or shape limitations. IMPERIAL is easy to clean – this carpet can be washed manually.

To prevent the rug details from scattering, the segments are fastened to the flooring by means of special double-sided adhesive tape. The new colourful IMPERIAL rug is a perfect match for a child's room!

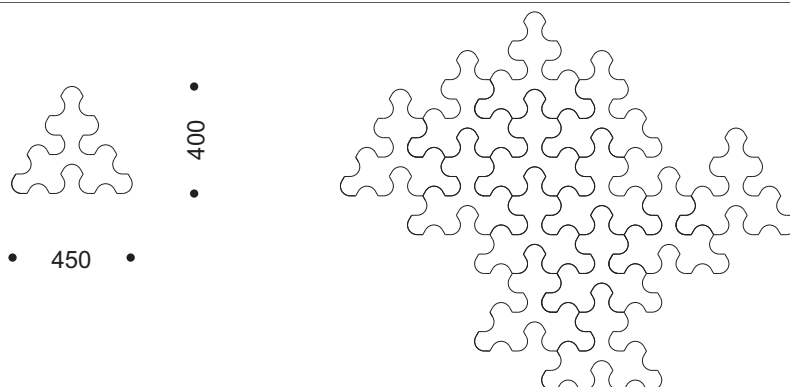

## materials

100% polypropylene; secondary backing: halfbad resine-ster(rubber)

## dimintions

(h x w x d): 1 pcs - 6 x 400 x 450mm, 1 unit (10pcs) - approx.1sqm
