

KU-DIR-KA

design: Paulius Vitkauskas_2006

rocking-chair

Your body feels a chair... You lean back and expect stability... But you feel motion. A classic design in the futuristic style... The KU-DIR-KA rocking-chair... Only three years old and already a national classic. KU-DIR-KA is not a rocking chair by it's nature, but corresponds perfectly to the three imaginary phases of dining – straight and steady during the speeches, leant forward a bit when wrestling with that mighty lobster, and allowing to sit back after a dessert.
